

# [Curriculum Vitae]

## Syed Imran Murtaza

---

### Objective:

"My objective as a software engineering student is to gain strong foundation in software development and programming principles, as well as to develop critical thinking and problem solving skills that will enable me to become a successful software engineer. I am seeking opportunities to learn more and apply my knowledge and skills to real world projects that contribute to the growth and success of the organization."

### Academic Qualifications:

- Passed Matriculation (SSC) examination from Karachi Board of Secondary Education.
- Completed Intermediate (Pre-Engineering) from Board of Intermediate Education Karachi.

### Skills:

- Proficient in basic programming languages: C++ and Python.
- Able to write simple programs and scripts to perform specific tasks.
- Knowledgeable in HTML and able to create basic web pages.
- Passionate about editing and photography as a hobby and continuously improving skills through practice and learning.

### Projects:

- Skilled in C++, having created basic games and programs using the language.
- Proficient in Python, with experience some projects and applications.
- Created multiple web pages using HTML.

### Field of Interest:

Data Science: developing software solutions for collecting, analyzing, and interpreting large volumes of data.
